MOHD AHMAD ANSARI

SOFTWARE ENGINEER

Saharanpur, Uttar Pradesh | +91 8273741672 | ahmadmohd48@gmail.com

Objective

Dynamic and innovative experienced Software Engineer, specializing in development and migration projects. Adept at leveraging cutting-edge technologies and methodologies to deliver high-quality software solutions. Eager to contribute my expertise in problem-solving, coding, and project execution to a forward-thinking team, fostering growth and driving excellence in software development. Seeking an opportunity to showcase my skills and collaborate on impactful projects while continuously expanding my knowledge in a stimulating and collaborative environment.

Experience

Infosys | System Engineer   **Aug 2022 - Present**

- **Home Drive – One Drive Migration:**
  - Spearheaded the successful migration of home drives to OneDrive for a diverse user base ensuring seamless access to critical data and enhancing collaboration efficiency.
  - Designed and implemented custom migration scripts and tools, automating the transfer of files and directories while maintaining data accuracy and security.
  - Developed robust testing procedures to validate data integrity post-migration, identifying and swiftly resolving any anomalies or inconsistencies**.**
  - Collaborated with the IT support team to provide ongoing assistance to users, troubleshoot OneDrive-related challenges, and optimize user adoption.

Infosys | System Engineer Trainee   **Mar 2022 - Jul 2022**

- **Microsoft Workplace Transformation:**
  - Working with SP Lists and libraries using TypeScript, React, jQuery and Office UI Implementing property pane in client-side web part using PnP JS Core and MS Graph API Testing SPFx web parts Deploying with Azure DevOps.
  - Learned about SharePoint permissions, site customization, and version control.
- **C# Programming and My SQL:**
  - Led the design and deployment of service layers using ASP.NET Core Web API, enabling seamless communication between front-end and back-end systems.
  - Developed and implemented advanced C# code, optimizing application performance and enhancing user experience.
  - Leveraged OOP principles to create maintainable and scalable code, contributing to improved system architecture and code quality.
  - Designed and deployed data access layers using Entity Framework Core, streamlining database operations and improving data retrieval efficiency.
  - Created and optimized stored procedures, triggers, and user-defined functions, automating routine tasks and improving data processing workflows.

Education

Glocal University   **Aug 2017 - Sep 2021**

B. Tech | Computer Science and Engineering (78.5%)

S.D Inter College   **Aug 2016 - Jun 2017**

Senior Secondary | PCM (65%)

S.D Inter College   **Aug 2014 - May 2015**

Secondary | Mathematics (81.16%)

Skills & abilities

- **Programming Languages:** C#, SQL, JS
- **Web Development:** ASP.NET Core, Web API
- **Database Management Systems:** MySQL, Microsoft SQL Server
- **Other:** Problem Solving, Communication, Debugging, OOP, LINQ, Typescript, .Net Core

Personal Detail

- **Languages:** Hindi, English, Urdu, Arabic (Basic)
- **Hobbies:** Gaming, Travelling, Reading
